

Stallion Surveillance & Monitoring

VIRTUAL GUARD FOR IMPROVED INCIDENT RESPONSE

Support on-site security personnel and maintain security practices with SwiftWatch™, Stallion's 100% effective remote monitoring service. Our virtual guards help to deter theft, reduce false alarms, and ensure procedural compliance across your site, and the solution is fully configurable to ensure specialized, around-the-clock protection for your people, projects, and assets.

REAL-TIME MONITORING AND RESPONSE

Our monitoring center is staffed 24/7, and when an incident occurs, the SwiftWatch™ team responds immediately. Trust Stallion's virtual guard to provide rapid support from the moment of notification until the appropriate responder is dispatched.

1. ALARM

An alarm is activated when a breach is detected on your site's surveillance system.

2. NOTIFICATION

Our monitoring center is instantly notified to take action when an alarm is triggered.

3. VERIFICATION

The SwiftWatch™ team remotely accesses live and recorded feeds to verify the alarm.

4. DISPATCH

Once confirmed, we dispatch police or first responders to manage the incident on-site.

ENHANCE SITE SECURITY & SURVEILLANCE

Deter theft, reduce false alarms, and ensure PPE compliance with Stallion's video monitoring services, fully customizable to protect your site 24/7/365.

Virtual Guard Features and Benefits

- ▶ Efficient dispatch and incident management
- ▶ Reduce false alarms with video-verified incidents
- ▶ Verify operational compliance
- ▶ Remote 24/7 access to real-time and historical analytics
