

HOWEN HERO Hero-ME41-04 Firmware Update:

Update MDVR with a USB disk (without other files or firmware)

- 1.Copy the update firmware in the root of USB disk.
- 2.Plug the USB disk in MDVR, make sure device is ON.
- 3.MDVR will upgrade and restart automatically.

Note: The LED will be lighting in turns in update. Please make sure power supply is normal in update.

4.If there is no image after upgrade ,please check MENU;ªRECORD;ªGenreal, change TV system to NTSC.The default setting is PAL .

If it failed, try the following way:

Step 1. Please use the MDVR to format your USB flash, so make sure their are no file in the USB flash.

change the Recording mode in the MDVR, MENU--RECORD--DISK3, set as Record. It will format the USB driver automatically.

Step2. Go back to MENU--RECORD--DISK3, set as NO.

Step 3. Plug the USB flash to PC, copy the FW to the root directory of the visible disk icon.

Step 4. Plug the USB flash to MDVR, the MDVR will upgrade automatically and restart.

Note: if it is not upgrading, maybe the MDVR format the USB flash, plug flash into PC to check, if empty, please copy the FW again to try.

If there is no image after upgrade ,pls check MENU--RECORD--Genreal, change TV system to NTSC.The default setting is PAL .
